Product Description

Product Description

High Quality Fiber Optic Connector SC/APC Male to LC/APC Female Fiber Optic Adapter SC LC Hybrid Optical Adaptor

Hybrid adaptors are used for mating 2 different style connectors or assemblies. These adaptors have a female adaptor end united to the back end of a different male connector which can be connected to an additional adaptor or interface of the same type. This can change the assembly end without the need for additional cable, therefore reducing space. Our hybrid adaptors conform to international standards, are quality tested, and are available in singlemode and multimode and come in many different connector-type configurations. Optical Adaptor are developed to couple and mate two identical or two different (hybrid) connector plugs. The housing of the Adaptors of the last generation has a reference key for the right position coupling and zirconia or phosphorus bronze split sleeve for high alignment. Newsun Tech could supply standard types of Adaptors, such as SC-FC, SC-ST, FC-ST, SC-LC, FC-LC and ST-LC etc. Hybrid adaptor.
